Orientation

the intervention

Scenes are played sequentially. When students have completed a scene, the next scene will unlock. Students must be sure to **complete** a scene before closing their browser or logging out. Completed scenes will be saved automatically. Longer scenes will auto-save at a couple points mid-scene, but it's safest to totally complete the scene.

personalized feedback

Peers will offer real-time feedback to players based on the choices they make in the game. Principal Shields will also give students quizzes at certain intervals throughout the game based on what they have learned so far.
